

GOOD LABORATORY PRACTICE (GLP)

About this Course

This interactive and engaging course examines the reasons why GLP is needed. It examines the regulations themselves, considers the personnel, equipment and facilities needed to conduct a non-clinical laboratory study that is GLP-compliant, and uses scenarios to look at how these Regulations apply in our own workplaces.

Who is the course suited to?

GLP regulates the practices of scientists working on the safety testing of prospective drugs. Compliance with GLP ensures the quality and integrity of data and that a true representation of that data is presented to the Regulatory authorities.

Course Contents

Module 1

Introduction to GCLP

Module 2

GCLP Requirements

Module 3

Implications of GCLP

Module 4

Knowledge consolidation and exam

Price: £149 inc. VAT (discount available for 6 or more users)

Duration: Minimum 2-3 hours

As with all of our courses, you can take this in your own time, on any device and can pause and restart from where you left off. Time taken will vary depending on your experience and how many of the many additional links and activities you chose to view.
