

About This Course:

Good Clinical Laboratory Practice (GCLP) guidance identifies and explores the systems and procedures that need to be followed within any organisation that conducts analysis of samples from Clinical Trials in compliance with the requirements of Good Clinical Practice (GCP). This GCLP course will examine the requirements which are necessary to ensure laboratory processes and results are GCLP compliant.

Who is the course suited to?

This course provides sponsors, laboratory management, project managers, CRAs and quality assurance personnel with an understanding of the framework for a quality system in analysis of clinical trial samples.

Module 1:
Introduction to
GCLP

Module 2:
GCLP
Requirements

Module 3:
Practical
Implications of
GCLP

Duration: Approx. 3-4 hours

As with all of our courses, you are able to take this in your own time, on any device and are able to pause and restart from the place you left off. Time taken will vary depending on your experience and how many of the optional links you choose to view.
